APPLE OFFICIALLY ACKNOWLEDGED THE GROWING CONTROVERSY OVER THE LOGGING OF

LOCATION DATA ON THE IPHONE AND IPAD.

"The iPhone is not logging your location. Rather, its maintaining a database of Wi-Fi hotspots and cell towers around your current location, some of which may be located more than one hundred miles away from your iPhone, to help your iPhone rapidly and accurately calculate its location when requested. Calculating a phones location using just GPS satellite data can take up to several minutes. iPhone can reduce this time to just a few seconds by using Wi-Fi hotspot and cell tower data to quickly find GPS satellites, and even triangulate its location using just Wi-Fi hotspot and cell tower data when GPS is not available (such as indoors or in basements). These calculations are performed live on the iPhone using a crowd-sourced database of Wi-Fi hotspot and cell tower data that is generated by tens of millions of iPhones sending the geo-tagged locations of nearby Wi-Fi hotspots and cell towers in an anonymous and encrypted form to Apple."

*This is hilarious, from the FAQ:
"How Do We Know that You Will Not Ascend To Heaven with Us?"
The Bible says that only those that repent
of their sins and accept Jesus as the True
Son of God will be saved. We do neither.
Some of our personal sins include:
drunkenness, heresy, sacrilege/blasphemy,
gluttony, lasciviousness, and sloth.
There is no way we are going to disappear
into Heaven any time soon.*

[75 of the WORLD's GREATEST QUOTES from ATHEISTS](#)

- If God doesn't like the way I live,
let HIM tell me, not you.

-Faith does not give you the answers,
it just stops you from asking the questions
(These are just words, and they can't hurt anybody, right?)

THE STAR SHIP ENTERPRISE
